

## RTLS Leader Sonitor® Technologies to Participate in the Cerner Health Conference 2016

*Sonitor, the RTLS Gold Standard, showcases live integrations with Cerner's FirstNet®, Tracking, and TemperatureLink Solutions Demonstrating the Power of RTLS in Healthcare*

**Stamford, CT** (November 14, 2016) – Sonitor RTLS Technologies, the global Real-Time Location System (RTLS) technology leader, opens its booth today (Booth 415) at the annual Cerner Health Conference (CHC) to be held on November 14-17, 2016, in Kansas City, MO. The 2016 conference theme, “Creating Healthier Stories,” promises to be an immersive, experiential and peer-to-peer learning experience inviting attendees to explore solutions that can help deliver care while proactively managing the health of their community and the financial health of their organization.

During the conference, attendees will have the opportunity to experience for themselves how Sonitor's Sense™ RTLS platform integrates with many of Cerner's CareAware™ solutions. Powered by Sonitor's RTLS technology delivering the most accurate and reliable indoor positioning data, these solutions provide transparency and alignment of assets, staff, and patients - at the right time and right place - ultimately helping healthcare facilities increase efficiency, capacity, productivity and throughput while decreasing waste and minimizing unnecessary costs.

Sonitor is also launching SenseVIEW™, setting a new industry standard in real time 24/7/365 customer and technical support with local and remote system monitoring. A state-of-the-art software program, SenseVIEW provides customers with immediate, visual confirmation on the health and performance of their Sonitor RTLS platform.

“We look forward to participating in CHC as it provides a unique opportunity to demonstrate to over 14,000 healthcare industry leaders, and practitioners, the positive impact that the integration of Sonitor and Cerner solutions can have

hospital-wide,” said Anne Bugge, President and CEO of Sonitor Technologies, Inc.

Sonitor has developed the healthcare industry’s most accurate and advanced open integration RTLS platform, Sonitor Sense™ for reliable indoor positioning in complex environments. Real-time location systems are used to automatically identify and locate mobile objects or people in real time. Sonitor Sense is designed to efficiently provide industry-leading location accuracy at bay, bed, chair, room, or area level depending on the use case. This fully scalable RTLS can be used for positioning patients, staff and assets in real time, as well as improving workflow, patient flow, and enhancing patient safety and infection control.

To learn more please visit Sonitor at CHC 2016, Booth# 415.

### **About Sonitor Technologies**

Sonitor Technologies’ tiered resolution Real Time Locations Systems (RTLS), with patented High Definition Ultrasound, Wi-Fi and Low Frequency RF (LF) capabilities, are specifically developed and designed for indoor positioning in complex environments. Sonitor has developed the healthcare industry’s most advanced open integration RTLS platform, Sonitor Sense™, a wireless system which supports a wide range of applications to make hospital operations more efficient. Sonitor is selected by world-class solution integration partners and healthcare provider organizations. For more information please visit [www.sonitor.com](http://www.sonitor.com).
