Powering What Comes Next

From locating critical assets to protecting staff and enhancing patient flow, Sonitor's platform and technologies deliver the accurate and reliable data required to optimize care delivery.

SonitorONE™ Platform Infrastructure enables efficient sub-room level accuracy as needed to automate workflows at the bay-level where care is delivered.

SonitorONE™ Badges and Tags locate assets, protect staff, and optimize patient workflows to ensure efficient care enterprise wide.

The SonitorONE™ Platform

High-precision location intelligence for healthcare.

SonitorONE™ Platform unifies multiple location technologies, modular software, and a scalable cloud architecture to deliver real-time data that improves safety, efficiency, and workflow automation across the hospital.

RTLS Infrastructure

- SonitorONE ultraBeacons™
- SonitorONE Gateways
- SonitorONE Basic Beacons

RTLS Tags

- SonitorONE Bluetooth® Low Energy (LE) Tags
- SonitorONE High Precision Bluetooth LE + Ultrasound Low Energy(TM) (ULE) Hybrid Tags

Management Console

Configure, control, and monitor the SonitorONE system. Change settings and add devices as needed.

Integration Layer

Synchronize with enterprise systems such as the EMR, Nurse Call, CMMS, and ERP to enable automations and AI systems.

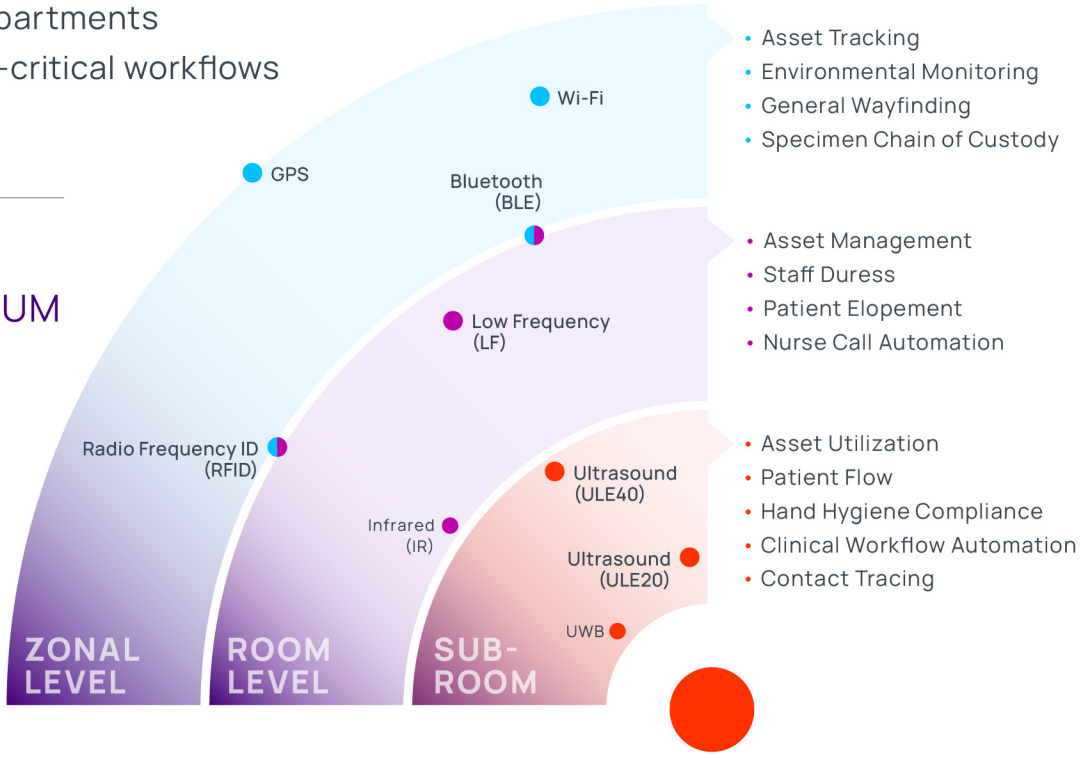

Purpose-Built for What Healthcare Needs Next

SonitorONE™ Platform uniquely combines **ULE, BLE, LF, RFID, GPS**, and **mobile phones as tags**, giving hospitals unmatched flexibility.

- Accuracy where it matters
- Scalability across departments
- Reliability for mission-critical workflows

ACCURACY SPECTRUM

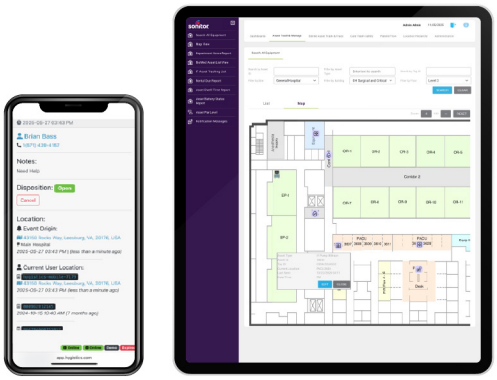

Aligning the right use cases with the right location tracking technology, all in ONE.

Software Applications

Workflow automation across the enterprise.

SonitorONE™ View

Find staff, assets, and patients

SonitorONE™ Asset

Increase asset utilization

SonitorONE™ Duress

Protect staff everywhere they are

SonitorONE™ Flow

Optimize workflows and patient flow

SonitorONE™ Hygiene

Automate hand hygiene compliance

SonitorONE™ Environment

Automate environmental monitoring

SonitorONE™ Specimen

Protect specimens with RFID tracking

Why Hospitals Choose SonitorONE™ Platform

- Proven accuracy in complex hospital layouts
- Hybrid architecture tailored by use case
- Secure, scalable, cloud-hosted platform
- Patented ULE and industry-leading mobile phone precision
- Location intelligence data for HIT and AI-based systems
- Customized to workflows and high-touch support

Sonitor has been named Best in KLAS for RTLS in 2024 and 2026
